PROFESSIONAL EXPERIENCE

Associate Software Engineer

Accenture

04/2024 – present

Pune, India

- Developed and maintained a web application, implementing daily feature updates and UI enhancements.
- Optimized React components to enhance performance and reduce load times, ensuring a smooth user experience.
- Collaborated with back-end teams to integrate REST APIs and enhance application functionality.

PROJECTS

The Wild Oasis: A hotel booking management app

- Developed a user-friendly hotel booking web platform using React, Styled Components, React Query, and React Hook Form.
- Implemented essential features including CRUD operations, user authentication, and reservation and cabin management authorization.
- Enhanced data management efficiency, user experience, and security by integrating advanced functionalities such as advanced filtering, sorting, pagination, role-based access control, modular components, and error boundaries.

Shoppy: An admin dashboard

- Created a React-based feature-rich admin dashboard app, implementing advanced state management with the Context API to ensure seamless user interactions.
- Demonstrated UI development expertise by seamlessly integrating Syncfusion components, enabling the creation of dynamic tables, interactive charts, and a Kanban board for an enhanced user experience.
- Developed personalized theming for user-centric design, prioritizing visual customization.

SKILLS

Languages: JavaScript, HTML/CSS, Java, Python

Libraries/Frameworks: ReactJS, Redux, TailwindCSS, Material UI, Bootstrap, Supabase
